

ABSTRACT OF THE DISCLOSURE

Methods and apparatuses for processing media data for transmission in a data communication medium. A set of data indicates how to transmit a time related
5 sequence of media data according to a transmission protocol. The set of data, includes a time related sequence of data which is associated with the time related sequence of media data. The set of data may be utilized by a digital processing system to transmit the time related sequence of media data (e.g., by packets generated according to the transmission protocol and the set of data).
